

“Live From McDonald Observatory!”

Videoconference Evaluation Instrument

Please read each statement and respond with your opinion.

FAX completed forms to 432-426-4150 or EMAIL to wetzel@astro.as.utexas.edu THANK YOU!

Statement	Strongly Agree	Agree	Do not agree nor disagree	Disagree	Strongly Disagree
Communication about the program was timely and I knew what to expect and how to prepare my students.					
The videoconference session illustrated astronomy in ways not possible in my classroom.					
My students were actively engaged during the videoconference.					
Communication about the program was timely and I knew what to expect and how to prepare my students.					
The videoconference session and/or associated web site helped me think of new ways to find and use NASA materials.					
I used one or more of the suggested pre-conference materials with my class.					
I plan to use one or more of the suggested post-conference materials with my class.					
This videoconference enhanced my classroom instruction and the curriculum.					
The videoconference session helped my students understand how astronomers do science.					
The presenter used appropriate teaching techniques for my students.					
Registering for this program via the Connect2Texas website was not difficult.					
Both the video and audio connection of the presentation was clear and not distorted.					

Please share with us which best describes you:

I participate in distance learning programs more than once a month.

This is my first distance learning program.

I participate in distance learning programs less than once a month.

Comments: Please write up to 25 words describing the videoconference experience for you and your students. Your comments are extremely helpful for improving this program.
